

# BEA Union Investment Asia Pacific Multi Income Fund

As at 30 April 2018

- BEA Union Investment Asia Pacific Multi Income Fund (the "Fund") invests in emerging markets and may be subject to higher liquidity and volatility risks.
- The Fund invests directly in listed REITs, equities and managed funds, and is thus subject to the risks generally associated with such asset classes, including but not limited to liquidity of the asset class, changes in investment sentiment, political environment, economic, business and social conditions in local and global marketplace.
- The Fund may invest in lower-rated fixed income instruments, including below investment grade and non-rated debt securities, which are subject to greater credit and liquidity risks than higher-rated securities.
- The manager may at its discretion make distributions from income and/or capital in respect of the distributing classes of the Fund. Investors should note that the distributions paid out of capital amount to a return or withdrawal of part of the unitholder's original investment or from any capital gains attributable to that original investment. Such distribution may result in an immediate reduction of the net asset value per unit.
- In terms of currency hedged class units, adverse exchange rate fluctuations between the base currency of the Fund and the class currency of the currency hedged class units may result in a decrease in return and/or loss of capital for unitholders. Over-hedged or under-hedged positions may arise and there can be no assurance that these currency hedged class units will be hedged at all times or that the manager will be successful in employing the hedge.
- Investors may invest in RMB (Hedged) units. It should be noted that the RMB is currently not a freely convertible currency as it is subject to foreign exchange control policies of the Chinese government. There is also no assurance that the RMB will not be subject to devaluation. Any devaluation of the RMB could adversely affect the value of investors' investments. There is no guarantee that the hedging strategy will be effective and investors may still be subject to the RMB currency exchange risk.
- The Fund may enter into futures contracts for hedging and investment purposes. Given the leverage effect embedded in futures contracts, the Fund may be exposed to significant losses.
- Investors should not make an investment decision based solely on this material.

1. © 2018 Morningstar. All Rights Reserved. Data as of 30 April 2018. The rating is for A USD (Dis).
2. Since launch till 31 December of the same year.
3. Please refer to the dividend notice available on website for dividend composition information and details. Dividend only applies to distributing classes and is not guaranteed. Past dividend record is not indicative of future dividend likely to be achieved. Annualised dividend yield = (dividend of the current month x 12) / last month end NAV x 100%. Please note that a positive distribution yield does not imply a positive return. Investors should not make any investment decision solely based on information contained in the table above. You should read the relevant offering document (including the key facts statement) of the fund for further details including the risk factors.

Performance is calculated in the respective class of denominated currencies on a NAV to NAV basis. Gross income is re-invested. HKD/USD based investors are exposed to foreign exchange fluctuations.

Investments in the Fund are subject to investment risks, including the possible loss of the principal amount invested. For full details and risk factors of the Fund, please refer to the explanatory memorandum of the Fund. Investors should also read the explanatory memorandum of the Fund for detailed information prior to any subscription. The information contained herein is only a brief introduction to the Fund. Investors should be aware that the price of units may go down as well as up as the investments of the Fund are subject to market fluctuations and to the risks inherent in all investments. Past performance is not indicative of future performance. The Fund has been authorised by the Securities and Futures Commission ("SFC") in Hong Kong. SFC authorisation is not a recommendation or endorsement of a scheme nor does it guarantee the commercial merits of a scheme or its performance. It does not mean the scheme is suitable for all investors nor is it an endorsement of its suitability for any particular investor or class of investors. This material has not been reviewed by the SFC in Hong Kong.
